

## Drug & Alcohol Testing Services

If you are employing staff, you need to ensure the health and safety of all workers, by not only ensuring they have a safe site, but that they are fit for purpose and capable of conducting their duties as a worker.

Drug and alcohol testing is a means of eliminating this risk from your business. Particularly in areas where your business poses significant risks that have been identified within your risk management process. It really is a **must have** now to have drug and alcohol testing as part of your health & safety plan for pre-employment, post incident and even random testing.

We can conduct drug and alcohol tests for you, which are carried out by our **accredited staff who follow AS/NZS 4308:2008 standards**. We have established a close working relationship with Canterbury Health Laboratories in Christchurch who are a registered and accredited testing laboratory. In the event that a test is non-negative, we send it away to them to confirm the results.

### Our Testing Includes:

- Pre-employment testing
- Random testing programmes
- Reasonable cause testing
- Rehabilitation
- Post-incident and near miss testing
- Urine or saliva testing
